
Company Profile

Connecting people, skills and organisations to opportunity.

Who we are

Market Place Development (MPD) is a strategic consulting and business-development practice founded and led by Wilna Havenga, an accredited Skills Development Facilitator, drawing on more than 30 years across industry development and consulting. MPD connects human capital, organisational strategy and sustainable opportunity — from international ISO-aligned training to professional-body development, CPD systems and lifelong career pathways.

MPD works across business, education, government and professional structures in South Africa, Africa and internationally.

What we connect

01 ISO Standards Training

Short, focused online and in-person programmes aligned to recognised ISO standards in AI governance, information security, privacy, quality and risk — delivered against the framework of an independent, internationally accredited Global Examination and Training Authority. MPD is its Authorized Training Reseller for South Africa and the rest of the continent.

02 Development

Professional-body development, CPD framework design, career-pathway development, accredited Skills Development Facilitation, and QCTO specialist services delivered with SR Training Solutions.

03 Coaching & Corporate Wellness

Business, beauty and wellness coaching alongside corporate wellness programmes — drawing on 20+ years running workplace wellbeing days, stress-management workshops and holistic therapy interventions for organisations.

04 Personal Career Passport

A lifelong development record connecting learning, experience, recognition and future opportunity into one evolving career story — currently in development.

Strategy through MPD. Implementation through SR Training Solutions.

SR Training Solutions is the specialist SDF and qualification-framework company linked to MPD, with a portfolio of more than 200 QCTO-accredited programmes and B-BBEE Level 4 status. While MPD leads strategic consulting and business development, SR Training supports organisations with QCTO accreditation, qualification and programme development, occupational-training frameworks and skills-development implementation.
